SECTION 702
BY THE NUMBERS

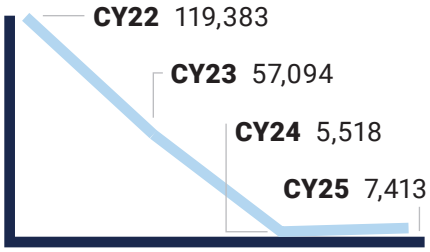
FBI Improvements Post-Reforming Intelligence and Securing America Act (RISAA)

Compliance Rate of FBI-Identified and DOJ National Security Division (NSD)-reviewed U.S. Person queries.

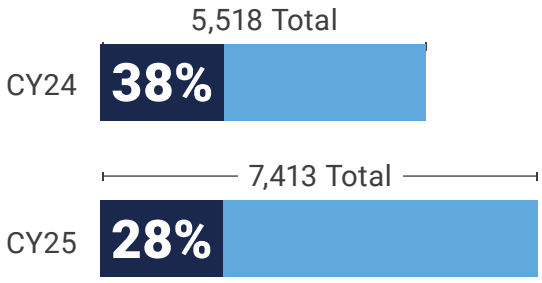
Percentage of U.S. Person queries that are reviewed by NSD and the FBI's Office of Internal Auditing (OIA)

Number of U.S. Person queries by calendar year (CY)

94%
drop from CY22 to CY25



Percentage of U.S. Person queries that return either content or non-content 702-acquired information



Number of U.S. Person queries that are either Victim or Target/Subject

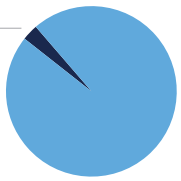
7,413
U.S. Person Queries in CY 25

786
Victim Query

3,934
Target/Subject Query

Percentage of 702 Targets routed to the FBI:

3.02%



Indispensable Intelligence on the Biggest Threats

702's Contribution to FBI Technical Reporting

95% Cyber

89% Emerging tech

77% Russia

77% Iran

53% China

Enhanced Accountability

In 2023, the FBI implemented Query Accountability Procedures (QAPs) to identify, evaluate and remediate query-related compliance incidents. RISAA codified the QAPs. DOJ's NSD reports every non-compliant incident to the FISC and to Congress, and any FBI personnel involved with such incidents immediately have their access to raw FISA information suspended pending further review per the QAP. Any compliance incident assessed to potentially be a result of intentional misconduct is referred to FBI's Inspection Division for further review. The FBI's compliance matters are reported to Congress in the Annual Query Accountability Report.
