SIX PAVN HIGH COMMAND SUBSCRIBERS IDENTIFIED

Analysis of the communications serving PAVN forces infiltrating into South Vietnam has revealed or confirmed the identification of six of the subscribers of the High Command broadcast facility as elements of the PAVN probable 304th and 320th Infantry Divisions. The remaining four subscribers of this broadcast facility remain unidentified through 18 January.^a

Identified subscribers include a) the Hq, probable 304th, first noted as a subscriber on 7 November and not previously identified; b) an unidentified 304th regimental subordinate, first noted on broadcast facilities on 5 November 1967 and previously erroneously identified as Way Station Echo;^b c) an unidentified suspect infantry regiment of the 304th Division, noted only on 11 January; d) the Hq, probable 320th Infantry Division, first noted on 4 November 1967; e) an unidentified suspect infantry regiment of the 320th Division, first noted on 3 December 1967 and now confirmed as a subordinate of the 320th; f) an unidentified element associated with the 320th, first noted on 19 November 1967 and previously reported as subordinate to the division. The subordination has not been confirmed by SIGINT.

Three of the four unidentified subscribers remain unlocated. The fourth was located in the vicinity of 16-43N 106-08E (XD 233486) on 15 January.^c
